INTERNSHIP

🏢 **AK Info Park** — Mobile App Developer Intern

🕒 **Duration:** 1 Month | 🛠️ **Technology Stack:** Flutter • Dart • Firebase • UI/UX Design

📋 **What I Learned & Worked On:**

🌀 **Flutter & Dart:** Built cross-platform mobile apps from scratch using Flutter framework and Dart programming language.

🧠 **UI/UX Design:** Designed clean, user-friendly app interfaces with smooth navigation flows, responsive layouts, and modern visual aesthetics.

🔗 **Firebase Integration:** Connected apps to Firebase Realtime Database for live data sync, and implemented Firebase Authentication for secure user login/signup.

📱 **App Development Lifecycle:** Gained hands-on experience across the full mobile development cycle — from design to build, test, and deployment.

🤝 **Team Collaboration:** Worked closely with senior developers, participated in code reviews, and followed agile development practices.

🛠️ **Skills Gained:** Flutter • Dart • UI/UX Design • Firebase Auth • Firebase Realtime DB .

PROJECTS

Task Management System PHP • HTML • CSS • JavaScript • DBMS

Full-stack web-based task management system with database-driven backend.

- Designed relational database schema for tasks, users, and deadlines.
- Built responsive UI with HTML, CSS & JavaScript for seamless task interaction.
- Implemented CRUD operations via PHP backend with MySQL integration.
- Features: task priority, status tracking, and user authentication.

Movie Rating Analysis Scala • Apache Spark • Big Data • SparkSQL

Large-scale movie rating analytics platform using Apache Spark and Scala.

- Processed large-scale movie rating datasets using Apache Spark RDDs and DataFrames.
- Implemented data pipeline in Scala for ingestion, transformation, and aggregation.
- Used SparkSQL for genre-based and user-based rating trend analysis.

Bus Booking App — Real-Time Tracking *Flutter • Dart • Firebase • Google Maps API*

Cross-platform mobile app for bus ticket booking with live GPS tracking.

- Built cross-platform app with Flutter & Dart for Android and iOS.
- Integrated Firebase Realtime Database for live bus location and seat availability.
- Features: ticket booking, seat selection, booking history, and push notifications.

Library Management System *Flutter • Dart • Firebase • API Integration*

Cross-platform library app with Firebase backend and Google Books API integration.

- Firebase Realtime Database backend for live book inventory and member records.
- Integrated Google Books API for automatic book metadata and cover retrieval.
- Features: book search, issue & return tracking, overdue alerts, and role-based access.
